

CSTC 2004-B: "Recommendations for Addressing Recurring Chemical Incidents at DOE"

[NOTE: In an effort to address the similarities and overlaps in their proposed projects for 2004 this team merged with the CSTC team 2004-C, "Enhancing Chemical Hazard Identification Methodology", established during the 6th Annual Chemical Management Workshop. The combined teams are being co-chaired by Jim Morgan and Fred Simmons, both of SRS, and co-sponsored by Billy Lee and Nancy Hammond, both of DOE/EH-52.]

Team Chairs:	Jim Morgan, WSRC	803-557-4668
	[James.Morgan@srs.gov]	
	Fred Simmons, WSRC	803-557-4240
	[Fred.Simmons@srs.gov]	
DOE Liaisons:	Billy Lee, DOE/EH-52	301-903-4884
	[Billy.Lee@eh.doe.gov]	
	Nancy Hammond, DOE/EH-52	301-903-1731
	[Nancy.Hammond@eh.doe.gov]	

Goals:

In 2003 the goal of this team was to analyze available data to determine the commonality and causes of chemical incidents across the DOE complex. This 2004 follow-on project will develop recommendations based on the Team's 2003 findings on the identification and analysis of DOE chemical incidents.

Proposed Products:

This team's 2004 product will be recommendations based on their 2003 findings in the form of a final "White Paper" on the identification and analysis of DOE chemical incidents for presentation to EH-1 and posting on the Chemical Management web page.
